| <b>Maximum Marks</b> | 3 Marks                                     |

### Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

#### Example:

| <b>Problem Statement (PS)</b> | <b>I am (Customer)</b>                                      | <b>I'm trying to</b>                                               | <b>But</b>                                                              | <b>Because</b>                                                                                               | <b>Which makes me feel</b>                                    |
|-------------------------------|-------------------------------------------------------------|--------------------------------------------------------------------|-------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------|
| <b>PS-1</b>                   | A student using an online learning platform                 | Understand difficult concepts and complete coursework successfully | I struggle to understand difficult topics and receive generic responses | Existing learning systems cannot recognize my emotions or provide personalized guidance                      | Confused, frustrated, and less motivated to continue learning |
| <b>PS-2</b>                   | A student preparing for examinations and coding assessments | Improve my knowledge and perform well in academic evaluations      | I frequently lose confidence when I encounter challenging problems      | Traditional learning platforms provide the same content to every learner without considering emotional state | Anxious, stressed, and uncertain about my performance         |
| <b>PS-3</b>                   | A learner seeking personalized academic support             | Stay motivated and maintain consistent learning progress           | I receive generic responses that do not address my emotional needs      | Most educational systems focus only on academic content rather than emotional well-being                     | Bored, disconnected, and less engaged in the learning process |
