Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • "I don't understand some topics even after reading them several times." • "I wish the learning platform understood how I feel while studying." • "I need personalized learning guidance." • "I want explanations that match my learning level."	THINKS • "Will personalized guidance improve my learning?" • "Can AI understand when I am confused?" • "How can I improve my performance?" • "I hope the system supports me emotionally."
PERSONA NAME Rahul Kumar <i>B.Tech Student (AI & Data Science)</i>	
DOES • Studies online regularly • Completes assignments and coding exercises • Searches YouTube and Google for explanations • Uses AI tools for learning support	FEELS • Confused during difficult concepts • Frustrated after repeated failures • Curious about new technologies • Confident and motivated after receiving personalized guidance
